Team Contract

Team Name: Group F

GOALS: What are our team goals for this project? What do we want to accomplish? What skills do we want to develop or refine?
Our team's goals for this Development Team Project are: ● Understand the applicability and challenges associated with different datasets for the use of machine learning algorithms. ● Systematically develop and implement the skills required to be an effective member of a development team in a virtual professional environment, adopting real-life perspectives on team roles and organisation.
EXPECTATIONS: What do we expect of one another in regard to attendance at meetings, participation, frequency of communication, the quality of work, etc.?
We agree to: • Attend all scheduled meetings (online/offline). If someone cannot attend, they notify the team at least **12 hours** in advance. • Participate actively in discussions and complete tasks by agreed deadlines. • Maintain clear and frequent communication via our chosen channel via discussion forum (Telegram) for initial discussions and Google docs. • Produce high-quality work that meets academic standards, including proper UoEO referencing. • Review one another's contributions constructively and respectfully.
POLICIES & PROCEDURES: What rules can we agree on to help us meet our goals and expectations, such as preparatory tasks, generating ideas, evaluating outcomes?

- Preparation: Members come prepared to meetings having reviewed required materials or completed assigned tasks.
- Decision-Making: Decisions are made by majority vote, after hearing all viewpoints.
- Version Control: All documents are stored centrally (Google), with clear versioning.

- Working Process: Brainstorm → Agree on approach → Assign tasks → Execute → Review → Integrate → Submit
- Meeting Notes: Every meeting will be minuted briefly (by Team Lead (or other member)).
- Response time: Check in at least once every other day.

ROLES: Which roles do we need in this project and how do we allocate them? Will there be a project lead? Is there a need to rotate roles?

- Project Lead / Coordinator (Adaeze / Sarah): Ensures progress, manages deadlines and meetings.
- Technical Lead (Damiano): Oversees regression selection/algorithm choice and code modules.
- Research and Documentation Lead (Jeroen): Sources academic papers, manages referencing. Coordinates the written report, ensures consistent structure.
- UML/Design Lead (Adaeze) : Prepares diagrams and system representations.

CONSEQUENCES: How will we address non-performance regarding these goals, expectations, policies and procedures? How do we resolve disagreements?

If a team member repeatedly does not meet expectations:

1. First occurrence → friendly conversation to clarify issues.
2. Second occurrence → raise formally in the group meeting.
3. Third occurrence → documentation of issue + notify module leader if necessary.

Disagreements will be resolved through respectful discussion, seeking compromise and evidence-based decisions.

By signing this contract, we confirm that:

- We have participated in formulating these goals, expectations, roles, procedures, and consequences as stated in this contact.
- we agree to abide by the contents of this contract

Adaeze Ugochukwu - 13/08/2026
Team member name and date

Damiano Tartarini - 13/08/2026
Team member name and date

Sarah Woodcock - 14/08/2026
Team member name and date

Jeroen Vreijsen- 14/08/2026
Team member name and date
